LYNK™

Direct Machine Connection for Data and Analytics

Track, Monitor, Analyze

Real-time essential metrics

No human intervention

Quick remote installation

Track production goals

Simple. Easy. Efficient.

SPENCERMETRICS
DATA-DRIVEN PRODUCTIVITY

WHAT IS LYNK?

A simple and effective solution that automates data collection and analysis

Uptime, Downtime, Utilization, Speed, Count, and more!

Key Features

Lights-out operation – collects **accurate** production data directly from your machines

Multi-vendor – supports **various** makes/models and technologies, both digital and conventional

Eliminates all tedious manual interactions – **saving valuable time and effort**

Provides a **real-time**, remote monitoring and analytics dashboard – to manage operations easily and efficiently

Data-driven insights enable users to make positive, impactful, and sustainable cost saving improvements
